Activity 6
If your class was 100 people...

In your class, what were the five most popular teams?
How many supporters did they have?

Name of team	Number of supporters
Other teams	

How many people are there in your class?
Calculate the percentage of people who support each of the five most popular teams!

Total number of people supporting the team	Total number of people in the class	= Proportion
÷		

| Team	Proportion	Multiply by 100	= Percentage
1.			%
2.			%
3.			%
4.			%
5.			%
Others			%

FOOTY STATS ACTIVITY 6

Activity 6
If your class was 100 people

If your class was 100 people, how many people would support each team?

Colour in the right number of 'people' for each team.

Use a different colour for each team.
